

COD-Warzone Tournament Guide

How to join a private match in COD-Warzone

COD-Warzone has a private match feature, but it will require all players to add an account to be the host for each game. The host for all COD-Warzone games will be **kcgo_warzone#2559448**

As of this writing, there is no option to spectate the overall game map and view players inside the warzone. We will be relying on your streams/vods to determine if there is player cheating/aimbotting which needs to be investigated. Please do yourself a favor and record your own gameplay.

To add a friend, start by clicking the SOCIAL button (see red arrow)

Next, click “Add Friends”

Search for **kcgo_warzone#2559448** and **MAKE SURE “Activision Account”** is selected. Every player **MUST** add “kcgo_warzone” to their friends list or they cannot be invited to the private match. Click the “Send Invite” button.

Each week, you will be required to launch Warzone and join the Warzone discord voice channel to validate you are going to play at the predetermined time. The Host will add you to the private match based on your username in this channel. All you need to do is open the game and wait and click “ACCEPT”

Once you click “Accept” - it will ask you about Squad Selection - select “Choose Your Own Squad.”

Now choose your team and join your squad.

Once a team is selected, chill and wait until the game launches - stay in the discord channel and then break out to your personal discord channels as soon as we start the game.

Remember to take a screenshot at the end of the game and submit it to the COD-Warzone scoring channel so we can see what place you came in and how many kills each player had. IF your capitan does not provide a screenshot in the five minutes after the game is complete, you will forfeit all points for that round.

Thanks for being part of the KC Corporate Esports Cup!
